Chews Lane Apartments, Wellington

Chews Lane Apartments allows contemporary inner-city living in one of 95 apartments situated in the vibrant and cosmopolitan centre of Wellington. Designed by Willis Bond & Co and Athfield Architects, Chews Lane Apartments is the final stage of the Chews Lane Precinct development, which also includes office space and a mix of retail cafés and bars.

Judges' Comments

"Above a mix of new and existing buildings, the apartment building straddles Chews Lane below, spanning the lane perpendicular to the carpark and office buildings located on either side. This innovative approach maximises the orientation of the apartments to views over the city and harbour. High-quality materials have been employed throughout the development, combined with energy-efficient services.
